Senior Candidate Application

This form is for anyone wishing to take the Engineering Obligation and receive the Iron Ring at a Camp 3 (Kingston) Engineering Obligation Ceremony as a Senior Candidate. Consistent with direction from the Corporation of the Seven Wardens issued in January 2026, Senior Candidate status is available to any applicant who meets the academic requirements for Professional Engineering licensure in Canada. An applicant may demonstrate this by providing clear evidence that they:

1. are a graduate of an accredited Canadian undergraduate engineering program, *or*
2. are or have been a licensed Professional Engineer in Canada, *or*
3. are or have been a registered Engineer in Training in Canada, *or*
4. have had their academic credentials accepted as satisfactory for Professional Engineering licensure by a Canadian Professional Engineering regulator.

To apply for Senior Candidate status, complete all sections of this form and send it to seniorcandidates@camp3.ca, enclosing the documentation specified. Incomplete applications and those received outside the application period advertised on the Camp 3 web site will not be considered.

Personal information

Family name _____

Given names _____

Preferred given name _____

Email address _____

Telephone number _____

Eligibility

Select one of the following categories and provide the specified information or enclose the specified documentation with this form.

☐ I am a graduate of an accredited Canadian undergraduate engineering programme.

Enclose a clear photograph or scanned copy of your diploma or of an official certified transcript showing programme completion. Unofficial transcripts are not accepted.

Only accredited Canadian undergraduate engineering programmes are acceptable under this category. Graduate engineering programmes (Masters and Doctorates) and programmes completed outside of Canada are not sufficient as these do not necessarily satisfy the academic requirements for Professional Engineering licensure in Canada.

☐ I am or have been a licensed Professional Engineer in Canada.

If your license information is visible on the issuing regulator's web site, provide the following information:

Regulator _____ License number _____

Alternately, **enclose** a clear photograph or scanned copy of your Professional Engineering license certificate.

☐ I am or have been a registered Engineer in Training in Canada.

If your Engineer in Training registration is visible on the issuing regulator's web site, provide the following information:

Regulator _____ Registration number _____

Alternately, **enclose** a clear photograph or scanned copy of your Engineer in Training certificate or of correspondence from a Professional Engineering regulator clearly stating that you have been registered as an Engineer in Training. In the latter case, the correspondence must provide enough information to allow us to verify its authenticity, e.g., by contacting the issuing regulator.

☐ My academic credentials have been accepted as satisfactory for Professional Engineering licensure by a Canadian Professional Engineering regulator.

Enclose a letter or other correspondence from a Canadian Professional Engineering regulator clearly stating that your academic credentials have been accepted as satisfactory for licensure. The correspondence must provide enough information to allow us to verify its authenticity, e.g., by contacting the issuing regulator.

Do not enclose academic transcripts or WES credential evaluations. Camp 3 and the Corporation of the Seven Wardens do not assess academic credentials; rather, we accept only assessments made by Canadian Professional Engineering regulators.

Declaration

I declare that this application, including all enclosed documentation, is true and complete to the best of my knowledge. I give Camp 3 permission to contact any organization necessary to confirm the validity of this application, including any academic institution or Professional Engineering regulator concerned, and to share with them any information provided on or with this form.
